

Louisiana: Graduate/Professional Financing Exposure Snapshot

Prepared from Campus Access Partners' GAP Index | Updated for Current Professional-Degree Guidance

Louisiana shows approximately **\$85.7M** in modeled graduate/professional exposure under the Published-Rule Planning Case and **\$72.0M** under the Current Interim Professional-Treatment Case. The **\$13.7M** difference reflects programs whose treatment changes under current guidance. The state analysis includes **22 institutions** and approximately **17,443 borrowers** represented.

The exposure profile includes especially strong concentrations in medicine, law, advanced / clinical nursing, business / mba, physician assistant, social work, and dentistry. Several clinical and professional pathways retain meaningful modeled exposure under both planning cases.

Exposure spans public universities and private nonprofit institutions. Louisiana's published-rule exposure-weighted FSA institutional nonpayment rate is 8.8%. However, 23.8% of published-rule exposure is at institutions in the 11%+ bands. These are contextual institutional measures, not direct estimates of graduate borrower risk.

Louisiana: Topline Numbers

Published-Rule Exposure	Current Interim Exposure	Difference Between Cases	Borrowers Represented
\$85.7M	\$72.0M	\$13.7M	17,443

State Context and Exposure Mix

Metric	Read	Metric	Read
Institutions represented	22	Published-rule exposure	\$85.7M
Programs represented	690	Current interim exposure	\$72.0M
Published-rule exposure-weighted FSA nonpayment rate	8.8%	Policy-sensitive exposure	\$13.7M
Exposure in 11%+ nonpayment bands	23.8%	Policy-sensitive share	16.0%

Sector Exposure Breakdown

Sector	Institutions	Published-Rule Exposure	Current Interim Exposure	Difference
Public	15	\$33.8M	\$26.6M	\$7.2M
Private nonprofit	7	\$51.9M	\$45.4M	\$6.5M
For-profit	0	\$0	\$0	\$0

Largest Institutional Exposure Points

Institution	Published-Rule Exposure	Current Interim Exposure	Difference	Primary Driver
Tulane University	\$36.3M	\$36.3M	\$0	Medicine / Other Graduate Fields / Business / MBA
Louisiana State University Health Sciences Center-New Orleans	\$18.8M	\$13.6M	\$5.2M	Medicine / Advanced / Clinical Nursing / Dentistry
Franciscan Missionaries of Our Lady University	\$6.2M	\$1.9M	\$4.3M	Physical Therapy / Advanced / Clinical Nursing / Physician Assistant
Louisiana State University and Agricultural & Mechanical College	\$5.5M	\$5.5M	\$0	Social Work / Business / MBA / Law

Selected Program Exposure Examples

Institution	Program	Published-Rule Exposure	Current Interim Exposure	Treatment
Tulane University	Medicine	\$16.0M	\$16.0M	Professional treatment unchanged
Louisiana State University Health Sciences Center-New Orleans	Advanced / Clinical Nursing	\$4.8M	\$1.8M	Temporary professional treatment; residual remains
Louisiana State University and Agricultural & Mechanical College	Social Work	\$1.5M	\$1.5M	Graduate treatment unchanged

Data note: Estimates use Academic Years 2021-2023 public data and are planning screens. The two cases are co-equal planning cases, not forecasts. FSA nonpayment is institutional context, not a direct measure of graduate borrower risk; rate calculations use institutions with matched May 2026 data. Interim treatment applies only to qualifying programs; exposure above the \$50,000 professional limit remains included. Current institutional data will provide a stronger operational read.
